The final extent of forest land in Medak District for diversion is arrived as **2.7283 Ha (with a length of 60627.27 mtrs)**

The said area is passing through these RF's to a length of about 60627.27 mts with a width of 0.45 meters. The canopy of these areas is 0.2 to 0.4 and there are 584 trees / poles are required to be removed from the said area proposed for diversion.

I have searched for other alternatives. But there is no alternate land available except the present proposals. This is barest minimum area i.e., required the T-Fiber project towards laying of optical fiber cable along the road. No work is started as on date in violation of FC Act 1980 and there are no encroachments.

  
District Forest Officer,  
Medak.
