**DETAIL PLAN FOR TRANSPORTATION OF MINERAL PROPOSED TO  
BE RAISED FROM THE MINING LEASE FOR PROPOSED MINING  
SITE IN MOHAL KUNR, DISTRICT CHAMBA, AREA 0.4087 HA.  
FOREST DIVISION BHARMOUR.**

1. The minerals proposed to be raised from this mining lease proposed for renewal in Mohal Kunr will be carried through Mule or ropeway to the nearest road head from Mining Lease area, approximate distance through mule is approx. 1.5 Kms.
2. Thereafter, the mineral/material will be carried out/ transported to the address/location of the individual/ firms as per the billing detail. It is not single or any specified address or road, it will be as per availability of road to their address or location. In average only 6.3 MT Qty. i.e. one truck/tipper will be move/deployed as detail given below. Hence, this will lead to a very negligible load on the transport density of road.

**Details of mineral and Truck Deployment:**

Annual production as per the Approved Mining Plan : 1900 MT (9500 for Five Year)

Per day production by considering 300 working days:  $1900/300 = 6.3$  MT.

Per day truck deployment : 6.3 MT i.e. only 1 Tipper/ Truck.

Transportation load due to carriage of mining mineral raised from this proposed site is very negligible.
