Srikanth has filed quarry lease application for Mica, Quartz & Feldspar over an extent of 12.08 Acres / 4.890 Hectares in Sy.No.357 of Chaganam Reserve Forest, Utukuru Village, Sydapuram Mandal, SPSR Nellore District. The applied area falls in Chaganam Reserve Forest. The application was received by this office on 16.10.2020 along with pre-requisites.

Further it is submitted that, the applicant has submitted Section-2 proposals to this office and requested to take further necessary action. In this connection this office has to submit Section-2 proposals to the Director of Mines and Geology, Ibrahimpattanam for onward transmission to the Principal Chief Conservator of Forests, Guntur for further necessary action.

In this regard, the applied area has been inspected by the Technical Assistant of this office on 6.11.2020 and reported that

**LOCATION AND APPROACH:**

The area can be approached by taking right at Sydapuram and travelling about 10 Kms on Sydapuram to Podalakuru road and taking left at Utukuru village and by travelling about 4.50 Kms towards Perumallapadu Village and taking left at Sona Kaluva and travelling about 0.30 Kms and taking left at Sona Kaluva and Telugu Ganga Canal and taking right at small bridge across Telugu Ganga Canal and taking left by travelling about 0.30 Kms, the applied site can be reached.

In order to travel from the subject area, the mineral transit vehicles have to pass through the narrow bridge across Telugu Ganga Kaluva near Perumallapadu village and travel on the Banks of either Telugu Ganga Kaluva upto Podalakur-Sydapuram bituminous layer road or on the Bank of Sona Kaluva upto Utukuru-Perumallapadu road. Hence, the permissions may be required from the Irrigation Department together with Forest Department.

#### **TOPOGRAPHY & GEOLOGY:**

Geologically the area falls under Nellore Mica schist belt where pegmatite / Quartz veins are intruded in to the mica schist rocks of Dharwar age and comes under Sydapuram-Utukur pegmatite zone, where there are number of mica mines are present around the subject applied area. The area having the elevated mound area having slopes in North-Eastern and Eastern side. The area having the herbs, shrubs and considerable tree growth. There are no important structures, nalas, monuments present in the area.

#### **FILED OBSERVATIONS:**

The Forest area consists of old mining leases viz., 1) Palman Mica Mine, 2) The Tellabodu Mine, 3) GVS Mine, 4) Sorangala Gani Mine. There are four (4) open pits in the subject area. All these pits are opened and water logged at present. The pits are opened mainly for approaching the pegmatite from the surface. At all the 4 pits, dumped materials are present around the pits. As seen from the open pits and the dumped materials it reveals that, Mica, Quartz and Feldspar are available abundantly. The available Mica is of muscovite variety having green colour, Quartz is of glassy and granular varieties having white colour and the Feldspar is of soda feldspar having white colour.

#### **PROPOSALS UNDER FC Act, 1980:**

Further it is submitted that, the Director of Mines & Geology, Ibrahimpatnam, Vijayawada vide Circular Memo No.12626/P/2015, dated 24.06.2015 while communicating the Letter Rc.No.45921/2001/FCA-4, dated 15.06.2015 received from the Principal Chief Conservator of Forests (Head of the Forest Force), Andhra Pradesh, Guntur requested to follow the guidelines issued therein while furnishing and recommending the Mining / Quarrying proposals pertaining to Private Agencies for the Forest clearance under FC Act, 1980.
