

### **Mitigation Measures to be Adopted to Maintain the River in Ecology**

The following mitigation measures will be adopted during execution of the project:-

1. Mining activities will be confined to 2 m depth in river bed All link roads from the mining area to the tar road will be properly sprayed with water for dust suppression.
2. Greenbelt and plantation on road side will help in dust suppression and will also reduce noise level.
3. Plantation will improve ecology and aesthetic beauty of the area.
4. Measures will be taken to prevent the workings from extending in safety zones, cutting the banks and exceeding 2 m depth limit from the river bed surface.
5. Air & Noise will test through different station for safety of the Environment.
