HEIGHTS & CONTOURS IN METRES

CONTOUR INTERVAL 20 METRES	
Water features are shown in blue where they generally contain water.	Contours are approximate.
Cultivated areas are coloured yellow.	A relative height, Δn , represents the approximate height, in metres, between the top and bottom of a steep slope.
The exterior boundaries of areas of Reserved or Protected Forests are shown by green ribands.	Wooded areas are coloured green. Scattered trees and other vegetation are in green, but prominent surveyed trees are in black.

The state boundary between Madhya Pradesh and Maharashtra States has been surveyed as pointed out by the local officials on the ground, but has not been verified by the Governments concerned.

In Marathi names the letter d has frequently the sound of r; y invariably the sound of i; and v invariably that of w, when an initial letter, and of o when otherwise placed.

Unexcultivated roads and cart-tracks in this sheet are generally motorable in dry season.

Tanks, shown dry in this area, usually contain water from July to December.
