

NO:- PW/JDT/CB/WA/Forest case/2022 1376
HP.
PWP.

dated 05/05/22

To

The Sub Divisional Officer (c),
Jhandutta, Distt. Bilaspur, HP.

Sub:-

Diversion of 2.8736 Hectares of forest land in favour of Sub-Divisional Magistrate (Civil) Jhandutta Distt. Bilaspur, HP for the construction of Mini Secretariat at Jhandutta within the jurisdiction of Bilaspur Forest Division.

Sir,

Kindly refer to your office letter No. Jhd-SDK(Mini Secretariat)/2022-2957 dated 06.05.2022 on the subject cited above. In this context this is to inform you that the observation at Point No. 8 this is clarified that, the area selected for the above mentioned project is slightly gentle slope and this patch of land has been proposed in the centre of the Jhandutta Town, which is approachable to the people of entire Jhandutta Tehsil. Although, there is no scope of soil erosion but if it seems that soil erosion possibility is there, then the following methodology will be adopted during execution of the said work:-

1. The construction will be done in step methods to stop the soil erosion.
2. It will be ensured that the plantation will be done in setbacks with the consent of Forest Deptt.
3. Vegetation:- the simplest and most natural way of prevention of soil erosion is through planting vegetation. Thus, the soil will be covered with growing grass and planting trees on it.
4. Retaining Wall & Brest Wall:- A retaining wall will block the creep of the soil and slow down the collapse.
