

Justification Providing to re-examination the alignment in Ghat, Paucha and Pai road.

Proposal number :- HP/HP/Road/150882/2022.

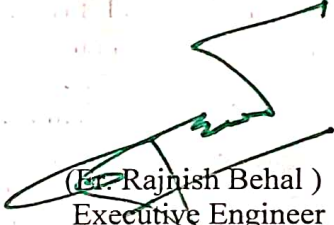

A Joint inspection to review the alignment of the proposed road to Ghat Paucha Pai was done on 12-12-2023 by DFO Rampur along with user agency (HPPWD Rampur) A meeting with villagers was held to make it possible to continue the road from village Beunthal which is also dead end of existing road. But beyond village Beunthal there is totally built up area and villager refused to donate their land for the C/O proposed road to village Pai, reason being their less land holdings .In regards to length of road this will not be reduced even if it is continued from village Beunthal because there is vertical difference about 200 mtrs between village Beunthal & village Pai. This much vertical difference forms about 4.0 km. Road, as per specified gradient of road. It is pertinent to mention here that if this road is constructed upto village Pai this will become a through route & connect market centre at Rohru which will be neare than market centre at Narkanda as the people of the village which are being connected directly & indirectly grow many type of cash crops.

Therefore keeping in view the above all facts the construction of this road is very important for the benefit of the people at large
