

PLAN FOR TRANSPORTATION OF MINERAL

The Gold Ore produced from this mine will be hauled by Tippers / Dumpers to the Company's Processing and Beneficiation plant to be established within the lease area to produce Pure Gold for marketing in the Bullion Market to cater requirement of Gold in Ornament / Jewelry Industries, Electronics & Computer Industries etc.

In the course of Beneficiation, Metal Gold will be extracted at the rated capacity of 1gm/MT with annual production of 60,006MT Gold Ore. After Gold extraction, the Slurry Tailings will be pumped and discharged in the Tailing Pond at designated space within the lease area. Thus, there will not be any bulk transportation involved outside the mining lease area.

Transportation of pure Gold to the market will be done by vehicles with high end security system.
