

RECOMMENDATION OF THE CHIEF CONSERVATOR OF FORESTS,
DINDIGUL CIRCLE, DINDIGUL

I have inspected the proposed site on 19.02.2020 and 05.06.2020 along with District Forest Officer, Dindigul and Forest Range Staff of AlagarKovil Range.

The proposed area for diversion is situated the Alagarmalai Reserved Forests of Alagar Kovil Range, Dindigul Forest Division. An estimated area of 1.567 hectares of Reserved Forest land is proposed for conversion of existing two lane road Madurai to Natham into four lane for development of economic corridors through NHAI.

The proposed diversion of area is essential for the development of this road. The area required is base minimum, Alternate alignment is not possible because, the existing road is passing through Reserved Forests on both the sides.

The proposed area does not fall in any wildlife Corridor or movement path of wild animals.

Based on the above facts I recommend for diversion of above mentioned Reserved Forest area to the project proponent.

Chief Conservator of Forests
Dindigul Circle, Dindigul.
