

## RECOMMENDATION

As observed during my field/site inspection done on dt. 6<sup>th</sup> Oct, 2017 for the areas of 11-20 Ha falling within the jurisdiction of LADC and MADC under southern Circle areas of Mizoram, I could see that there would not be serious and negative impact to the environment of the areas falling within the proposed project areas for “Widening and upgradation of NH-54 to 2-Lane with paved shoulder and geometric improvement” in the sites of forest land falling at Lawngtlai District District (LADC) and of Siaha District (MADC),

Thus I recommend this alignments as proposed by the project as there is no better alternative route.
