

RECOMMENDATION

Power Grid sub-station is very essential in Giridih District as there is no other power sub-station in giridih due to which there is always a problem of low voltage and less period of electric supply. Further this project will help to generate employment to local people. Hence establishment of power grid Sub-station at Badkisaria (Tola-Mandhaniya) 4.05ha. near Giridih district is recommended for improvement & enhancement of power supply.
