No. B2/Land/Solar Project/CR-02/2016-17

Date:30.12.2016

Recommendation Report

The solar electrification project in Palar is recommended with following conditions.

- a) The project work should be carried from 6.00 am. to 6.00 pm. and care should be taken that there is no disturbance to wildlife.
- b) Solar fence to be erected around the project area should be between 8 to 9 Kv volt/watt. care should be taken that none of the wild animals get electrocuted by this fence. User agency will be held responsible for any untoward incidence that happens due to this project to wild animals in the near by reserve forest area.
- c) User agency is responsible for any difference of opinion if any that will be arise by the Hakku patra holder under FRA 2006 of that land where project is proposed and they have to resolve the issue.
