

Site Inspection report of Dy. Director

The Jio Optical fibre will be laid along the existing Kutmu-Garu-Mahuadanr road and Garu-Banari Road. It was found that no tree needs to be felled for the project. At certain points, where there are streams crossing road, care has to be taken not to damage or divert the stream for the purpose of digging trench. The trench dug for laying cable should be filled up immediately after laying the cable. Apart from this the project does not harm the fauna in the project area.
