

Recommendation

Proposal No. FP/JH/ENCRH/39652/2019

Name of Proposal- Expansion of existing DRI plant (4 X 100 tpd kiln) by adding the captive power plant and SMS for capacity expansion and to control the pollution.

The above project is recommended considering its site specificity, JJ land being already in non-forestry use, old unaware noncompliance and positive outcomes of the project like reduced air pollution and lesser loss of groundwater. Undersigned recommends following conditions to be imposed while giving forest diversion:

1. UA should install/construct two random forest check post with hydraulic barrier and camera with lease internet line- one at Budhakhap village road and other at Karma Mines Entry Point in consultation with RFO Kuju.
2. UA should provide water outlets for agriculture purpose to villagers at multiple points.
3. UA should make a small dispensary with provision of doctor for free health checkup of villagers.
4. UA should submit compliance of EC and data about stack emissions on monthly basis to Divisional Forest Office too.
5. UA should provide a patrolling vehicle for Kuju Forest Range.
6. UA should contribute 50% of CSR attributed to the unit, for forestry and WL activities in consultation with DFO, Ramgarh.

Divisional Forest Officer
Ramgarh Forest Division
