

SITE INSPECTION REPORT

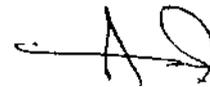

The proposal for diversion of forestland for Non Forestry purpose was received from M/s Yammeng Green Energy Private Ltd through the Chief Conservator of Forests (Cons.) & Nodal Officer (FC) Itanagar, for development of Yammeng Hydro Electric Power Project (20 MW) located at Yammeng River near Gobuk village areas of Upper Siang Districts. The proposed area of forest land was inspected on

Following observations were made during the inspections: -

1. The Forest area involved in the proposal forms a part of sub-tropical semi-evergreen forest type. The trees are short to medium statured in general. The area involved is mostly hilly terrain forming part of large tract of unclassified forest area where local communities enjoy cultivation and other usufruct rights. Jhum cultivation is practiced wherever suitable with intermittent permanent terrace cultivations; Horticulture crops and habitations.
2. From the available records no rare or endangered/unique Flora & Fauna or wildlife spp recorded or were noticed within the proposed forest land diversion area. No wildlife species noticed during the course of inspections.
3. No Defence establishment; archeological site or monument exists within or nearby the proposed area for Diversion.
4. There was no violation of the forest conservation Act at the site during the inspection.
5. The forest land proposed for diversion is barest minimum and unavoidable.
6. The nearest P.A. from the project site is Mouling National Park and its aerial distance is 15 Km. approx. from the project area involving hilly terrain.
