

RECOMMENDATION FOR THE PROPOSED CONSTRUCTION OF BRIDGE  
4/2 OVER THE RONGAP RIVER INCLUDING APPROACH TO THE BRIDGE  
ON RSN ROAD.

The project is utmost important when proper road connectivity to the region to better the socio - economic condition of the people living in the area is considered. The forest area to be diverted for this project is bare minimum and shall be almost compensated once the approach to the old bridge will be left unused after the old bridge will be dismantled.

I therefore recommend forest clearance for this project.
