

**13. Specific Recommendation of the DCF for acceptance or otherwise of the proposal with reasons.**

The farm land gat no. 2732 is surrounded by the forest gat no. 2731. It is a plateau and surrounded by hilly area from all side. There is only one side available to approach the farmland gat no. 2131. There is no path way facility available to carry farming material like plough, instruments, manure and bullock-cart is inaccessible to the farm land.

As the need of farming activities, project authority has decided to construct approach water bound macadam road starting from existing Kivale to Ranmala village road to malki farmland which is 229 meters away. The forest area 0.068 ha. to be required to construct approach water bound macadam road which is proposed & passing through forest Gat no.2731 of village Kadus, Tal-Khed, Dist-Pune.

The demanded and required forest area lies in between the existing Kiwale ro Ranmala village road and malki farmland. The forest area required is only 0.068 ha. ( $229\text{m} \times 3\text{m} = 687 \text{ sq. mtrs}$  i.e. 0.0687 ha.) for this purpose. There is no alternative non forest land available for this purpose. It is not possible to avoid the forest land. The forest area to be diverted is not sensitive for any flora or fauna. The construction of water bound macadam will not have any adverse effect on the ecology of the area. Hence the proposal is recommended for acceptance.

  
(A.R. Satpute)  
Deputy Conservator of Forests,  
Junnar forest Division, Junnar.
