16.	Proposed area should not be part of any protected area. Also distance from the boundary of the nearest protected area should be more than 10 kms.	
17.	Dependence of tribal in the area. Whether the rights of the tribals have been recognized in this area.	There are no rights on the land proposed.
18.	Utility of the project, including the people living in close vicinity of the project.	In order to cope with increased demand of passenger and goods traffic, 3rd railway line will facilitate the faster transportation. Since this is a capacity augmentation of existing Railway line, so the most feasible alignment is chosen utilizing entire existing available RoW already in possession of Railway.
19.	In case of renewal whether all the conditions stipulated in this earlier sanction order have been complied with.	Not applicable.
	Alternatives examined by the user agency in case of non-site specific projects.	Alternatives were examined and thus railway line decided.
21.	A certificate by the user agency that the forest land requested for diversion for non-forest purpose is bare minimum.	Certificate from user agency is enclosed in the project.
	Any scope of saving tree growth while ensuring that the purpose for which the forest land is being diverted is also not adversely affected.	Only those trees which are coming directly in the 3rd railway line path will be cut. Rest of other trees will be saved.
23.	Any other issue of significance.	No other issue.
24.	Specific recommendations of the DFO with reasons for approval of the project.	On the condition that user agency will facilitate all required mitigation measures for wildlife under the Satpura- Melghat corridor, I recommend for the project.
