| 9                        | Condition of vegetation and type of forest applied area.   | Tropical Moist deciduous Forest  |                 |  |             |              |  |             |       |  |          |       |  |                          |              |  |
| 10                       | Position of wild life in general   | The area especially the Donga RF consists of Leopard, Wild Boar, Sloth Bear, Fox, Pangolin, Elephant Movement, Sambar, Barking Deer etc. Site specific wildlife plan is needed in the project impact area for maintaining the ecological continuity and ecosystem coherence. |                 |  |             |              |  |             |       |  |          |       |  |                          |              |  |
| 11                       | Whether the applied area is involved with any eco-sensitive area/ national park/sanctuary.                       | No   |                 |  |             |              |  |             |       |  |          |       |  |                          |              |  |
| 12                       | No. of tree to be felled and its impact on the eco-systems.  | Total trees Enumerated inside the Forest area- 402   |                 |  |             |              |  |             |       |  |          |       |  |                          |              |  |

|    |  |  |
|----|--|--|
| 13 | Details of broken up area and reclamation done if any.   | Nil  |
| 14 | Position of displacement of people and adequacy of rehabilitation if any.                              | No displacement of any human habitation involved.  |
| 15 | Position of rare and endangered species available of importance of area from eco-social point of view. | <p>The area consists of Leopard, Wild Boar, Sloth Bear, Fox, Pangolin, Elephant Movement, Sambar, Barking Deer etc. Site specific wildlife plan is needed in the project. The area consists of highly dense natural high Sal Forest. For protection of the forest quality in the area 3 ( three) check gates needs to be installed at following locations.</p> <ol style="list-style-type: none"> <li>1. Near Kutibari village at division boundary Boudh and Phulbani</li> <li>2. Near Pakadajhar waterfall.</li> <li>3. Near Kurumuni beat quarter in Kurumuni village.</li> </ol> |
| 16 | Area selected for diversion if included in the D.L.C report or not.                                    | No.  |
| 17 | Suitability of the identified non forest area for compensatory Afforestation.                          | <ol style="list-style-type: none"> <li>1. Non-forest land over 9.195 Ha in Jharabalaskumpa suitable for ANR 200 Plants/Ha for about 1839 plants.</li> <li>2. Degraded forest land over 6.25 Ha in Nandini 'B' PRF, Tikabali Range, Chakapad Section . Suitable for Bald Hill mode plantation 1600 plants /Ha for balance plantation.</li> </ol>  |
| 18 | Violation of forest (conservation) Act 1980 if any and action taken thereof.                           | No.  |
