

**Site Inspection Certificate for forest area by Deputy Conservator of Forests.**

I inspected the linear area has no trees proposed for the maintenance of already laid water supply pipeline in Valkaradu RF in Theni on 23.10.2015. The area is located in gently undulating terrain. The area falls under the Vaigai catchment.

The linear area proposed for the maintenance of water supply pipe line is 0.0573 Hectare (573 M<sup>2</sup>) and in the length of 382 metre, average width of 1.50 metre and average depth of 2.10 metre in area and is located right on the boundary of existing road connects KRR Nagar to Periyakulam Bye pass road in Valkaradu RF.

There is no spontaneous tree growth in the proposed forest area. There is no endangered species of flora and fauna found in the proposed area. The proposed area for diversion does not have any important monuments which are archaeological / heritage site / defence establishment etc.,

In the proposed area, the user agency has not carried out any work, which contravenes the Forest Conservation Act 1980. Since there is no alternate route for water supply pipeline, Water supply is very much essential to public, on this ground diversion of 0.0573 Hectare Forest land is recommended.
