

**Recommendation of the Divisional Forest Officer
Southern Forest Division: Churachandpur**

1. The project is a public utility service project for the benefit of the people to be managed by the State Government.
2. The Transmission line from Khengjang to Thanlon goes along the National Highway – 2. The proposed alignment of the Transmission line is the best option.
3. The project passes through the Forests under Southern Forest Division, Kailam Wildlife Sanctuary and its Eco-sensitive Zone. The project proposes construction of 242 towers with a total stringing of transmission line of 53.925 Km with total diversion of 145.6 ha. of forest land and is the barest minimum.
4. Hence, the diversion of 145.6 ha of forest land for the project is recommended subject to payment of amount for Compensatory Afforestation, Net Present Value, Impact Mitigation and Wildlife Management Plan and Dwarf Species Plantation.

Place: Churachandpur

Date: 16th January 2016
