

Inspection report of Divisional Forest Officer

On 03-05-2018, I have inspected the Kutcha road passing through forest area from Kommeri LP School near Thalassery-Bavali highway to Kunjiveedu colony. The Kutcha road is passing along the boundary of Kannavam extension reserve forests having plantations of Teak and Softwood belonging to years 2009, 1969 and 2013 in the sequence starting from Kommeri.

This road which is currently having a width varying from 2 to 3.5 Meter and is currently being used by 20 non-tribal and 5 tribal families. Concreting of this road will be useful for these families. No adverse effect on flora and fauna is envisaged as the road is passing along the edge of forest plantations.

Therefore, it is recommended to divert the forest land for the purpose of concreting of Kommeri-Kunjiveedu colony road.

**Divisional Forest Officer,
Kannur.**
