

BRIEF NOTE

The main objective of the scheme is to connect the interior villages to nearest market places, thereby providing infrastructure facilities to the villages which in turn will solve unemployment problem of poor tribes living in remote areas. They will also help in improving the social life of the tribes.

The proposed road from "Dabbagunta to Pallapudungada in S Kota Mandal" is to serve the habitation (Tribal) having a population of 401 members (Rayapalem having a population of 119, Pallapudungada having a population of 282.). As there is no proper transportation facilities the school going children are becoming agriculture labour. The basic occupation of the people in this area is agriculture and agriculture is totally rain fed. The crop yielding is generally very good and needs to be transported to the nearest marketing center and weekly Sandies so as the farmers get better benefits and true value. It is required to bring this tribal population into normal civilization by providing this road. By laying this road, the poor tribes living in remote areas can transport the Non Timber Forest Produce collected from the nearest sandies for sale. The Government Organization like Girijan Co - Operative Societies will directly make contacts with the Tribal people and they will buy the forest products without mediation of brokers. There by the tribes will get benefited by getting better income and become better civilized.
