

# Office of the Deputy Conservator of Forest, Ajmer

## Certificate Regarding Protection Wall

(Proposal No. FP/RJ/TRANS/29091/2017)

It is recommended that a total of 1.0 km protection wall on entry side should be constructed from the protection point of view.

While contracting the transmission line the vehicular movement will create temporary way. As the area adjoining is cultivated land and there is a high possibility of encroachment.

So the protection wall is recommended in forest protection interest.
