The above points are verified on field and found tallied.

The density of the adjacent RFs is 0.4. This areas fall in Eco-Class IV (Tropical thorn forests and tropical dry ever green forests) open scrub forest. No valuable tree species are existing along with alignment of the OFC cable. The user agency has not violated the provisions of FC Act, 1980 and Wild life (Protection) Act, 1972 in the said Forest area. The Rare/unique/endangered species of flora and fauna like Red sander species are noticed in adjacent RF areas. The proposed RF areas are not vulnerable for erosion. There will be no impact on flora and fauna of adjacent RFs due to this project since it is an underground Optical Fibre Cable along the existing road.
