## Undertaking

I Rohit Bansal partner of OJAS GRAM declare that the project has been proposed on private land and the same has been purchased during the year 2019 under section 118 of HP govt. Further the patch of land located on the upper edge of the existing PWD road was having one path which was used by the locals for transportation of materials as well as access to reach their private lands. The path is transversing through both private as well as legal forest land. The existing path has been utilised as such without making any alterations or undergoing any earth work.

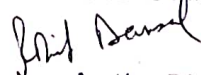

The wellness project being an investment opportunity in the state of H.P. has been proposed with the intent to propagate the model of eco friendly means to treat health issues as well as create local livelihood opportunities in the region and its surroundings. The path has been utilised for transportation of men, machinery and material for one component of the project, and that too with the intent of not delaying the project as the same is leading to escalation of project cost. It is further submitted that the proponents of the project which has been proposed on the lower end of the PWD road are on stand still and no such works has been carried out till date.

It is therefore prayed that there is no such willful disobedience of any of the forest laws and no such violation has been carried out at our end. Further it is accepted that the path has been utilized for transportation of materials and that too passes through a very minimal patch of legal forest. Further if any such penal NPV is proposed for the instant case, we submit the undertaking to pay the same pleas.
