

**Full Title of the Project : Construction Entry/Exit of RK Puram metro station
for MRTS Project**

File No :

Date of Proposal :

Brief Note on the project

DMRC is implementing phase-III of the MRTS project in Delhi and NCR. Under phase-III a new corridor from Janakpuri(W) to Kalindi Kunj is under construction.

Under the scheme, metro stations are constructed at a distance of 1-1.5 km. to benefit the maximum commuters. Efforts are made to acquire least possible Land for construction purpose. A proposed R.K. Puram metro station is located adjacent to intersection outer ring road, Africa Avenue Marg. In this station, forest land is required for construction of the Entry/Exit of underground Metro Stations namely R.K. Puram in District Sports Complex, DDA, Hauz Khas. This entry/exit is located on the east side of Africa Avenue Road. The necessity of this new entry/exit has arisen due to the demand of RWA's and insistence of Traffic police department to give an entry/exit point on DDA Sports Complex side so as to enable the road user to use the station subway below Africa Avenue road as pedestrian crossing. Earlier an area of 4.2309 ha Forest land was diverted in the same location for construction of R.K. Puram and IIT Station as well as the tunnels joining them vide Northern Regional Office, Ministry of E&F, GoI, letter No. F.No. 9DLB 393/2013-CHA dated 05.02.2014. The date of start of construction of this entry/exit is December, 2014 and date of completion is June, 2015. As per DPR, once commissioned, R.K. Puram metro station is expected to carry 10077 passengers per day in 2016. The proposed entry/exit for stations will, mainly cater to residents of govt. quarters in R.K. Puram, students and employees of JNU, nearby govt. offices and labs. Opening of this station and entry/exit will yield significant reduction in the road traffic in addition to other socio-economy benefits including environmental benefits
