### Site Inspection Report

**Proposal No:** FP/ML/IRRIG/41289/2019

**Name of Project:** Hydrological Observation Station

The Office of Executive Engineer, North Garo Hills, Water Resources Division, Resubelpara, North Garo Hills have proposed for installation of the Hydrological Observation Station vide FCA Proposal No. FP/ML/IRRIG/41289/2019 near the Manda River at Satmile in the Chimabangshi Reserve Forest under Dainadubi Range of East & North Garo Hills Division. The GPS Location of the Hydrological Observation Centre is at 25°50'14.00"N 90°46'55.00"E and measuring 0.01 Ha (100 SqM).

The proposed Hydrological Observation Station involves diversion of 0.01 Ha of Forest Land of Chimabangshi Reserve Forest, and this project does not involve felling of trees. The proposed Hydrological Observation Station falls under National Hydrology Project, Government of India, the data collected will be used for water resources planning and for flood prediction.

The Approach Road for the Hydrological Observation station is not needed since the station is connected by both NH 62 Road and Satmile – Mendi (Kutchu) Road.

The proposed Hydrological Observation Station will not have a significant negative impact on the Biodiversity, Flora and Fauna of the region and the area proposed for diversion is prone to soil erosion during floods, due to its proximity to River Manda, Whereas since the main objective of the Hydrological Observation Station is to monitor the Water Flow it should be situated next to the River and this project does not directly or indirectly increase the soil erosion in the area as it involves diversion of an area of only 0.01 Ha, and it does not involve in felling of any Trees and is does not cause any pollution.
