

RECOMMENDATION

The project, **“Improvement and upgradation of Tlabung – Kawrpuiuchhuah road to 2-lane standard in the State of Mizoram”** passes through forest land at the starting stretch near Tlabung and at the ending stretch near Kawrpuiuchhuah. The road is an important route for Indo-Bangla trade at Kawrpuiuchhuah where Integrated Check Post is to be established. The project includes widening of the existing road of single lane to 2-lane NH standard. Out of the total road length of 11.85 Km, only 4.15 Km of the road passes through notified forest land. There is no rare and endangered species of fauna, no archaeological/heritage site, defence establishment or important monument in the project area. There is no alternative option to connect the border village of Kawrpuiuchhuah other than the existing road which only requires improvement and upgradadtion.

Hence, in view of the facts stated above and after carrying out the site inspection, the project is recommended for approval by the competent authority.
