

## RECOMMENDATION LETTER

**Name of the Project: -** Construction of canal and laying of underground pipeline under Chachadi lift irrigation Scheme in favor of the Executive Engineer, KNNL, Gokak

During my Site Inspection I have noticed in the said proposed project area that the forest is covered with shrubs and bushes and don't find big tree. This project helps in feeding water to many farmers to their agricultural land for lively hood and betterment.

Keeping in mind of the above I am of the opinion that, this project may be recommended for approval.

  
(S.J. Chandra Shekar)

Deputy Conservator of forests  
Ghataprabha Division, Gokak
