| | (b) Non- forest land: | 404.87 Ha. |

- (v) Progress of Compensatory Afforestation as on the date: 481.16 Ha.
 (a) Forest Land: 76.29 Ha.
 (b) Non- forest land: 404.87 Ha.

13. Specific recommendations of the Dy.CF. for acceptance or otherwise of the proposal with reasons:

The pipeline is to be laid along the existing road connecting Nhavare to Bori Pardhi, within its RoW. The project has definite locations and definite routes for pre- approved locational class tap off/dispatch station, location of sectionalizing valves, Intermediate pigging/pumping stations and receipt station, etc. As such, the project is site specific.

The project is site specific as there is no alternative "non- forest route" available with Torrent Gas for execution of the extant proposal. Hence, diversion of Forest Land becomes unavoidable. The requirement of Forest Land is assessed to be minimum for the project. Further, no tree felling is required for the proposed project alignment.

The project is vital for boosting India' s economy and improve the quality of environment. It will contribute positively as the country' s natural resources will be put to optimal use. Hence, the proposal is recommended for acceptance.
