

## **SITE INSPECTION REPORT OF DISTRICT FOREST OFFICER AND WILDLIFE WARDEN, TIRUNELVELI**

I have inspected the proposed area on 09.12.2019. The proposed area is 0.1196 ha falling in Muthur RF of Tirunelveli Range of Tirunelveli Forest Division for the diversion of forest land for CWSS to Reddiarpatti and other 63 rural habitations in Palayamkottai Union in Tirunelveli District. The area has thorn scrub vegetation. The linear area of proposed water supply pipeline is 0.1196 ha and the length of 1.994 Km and average width of 0.0006 m and average depth of 1.2 m.

No tree is felling in this project and no endangered species of flora and fauna in the proposed area. The proposed area for diversion do not have any important monuments which are archaeological / heritage/ Defence establishment site etc.,

In the proposed area the user agency has not carried out any work which contravenes the Forest Conservation Act 1980. Since there is no alternate route for water supply pipeline, water supply is very much essential to public, on this ground CWSS to Reddiarpatti and other 63 rural habitations in Palayamkottai Union in Tirunelveli District diversion of 0.1196 ha Forest Land is recommended.
