Both these villages have existing black top road already existing and this is part of a dense forest with canopy density of about 0.6-0.7, under these circumstances the road can be recommended strictly subject to the following conditions:</p> <ol style="list-style-type: none"> 1. Trench to be taken on both sides of road to avoid any encroachment. 2. The trees that are to be felled should be translocated in the near by forest area, the execution to be done by the forest department and all the execution charges to be borne by the user agency.
