

**Recommendation.**

The road proposed to be diverted (from NH-6 to Tansara) passes through Badrama Wildlife Sanctuary. The road is very important to be upgraded in order to improve the living conditions of villagers of Udusung village. At the same time, as the road passes through sanctuary area, which is endowed with the presence of wide variety of flora and fauna. The increased traffic and easy accessibility to the sanctuary area by the outsiders because of the up gradation of the road may put high biotic pressure on the wildlife habitat here. Hence the project proposal can be considered only after getting the wildlife clearance from the authority concerned.
