

SITE INSPECTION REPORT OF
CHIEF CONSERVATOR OF FORESTS (WILDLIFE) & FIELD DIRECTOR
ON 22.05.2020

The site for proposed laying of Optical Fibre Cable by Reliance JIO Infocomm Limited through Pampadum Shola National Park was inspected along with Wildlife Warden, Munnar and field staff on 22.05.2020. The OFC is proposed to be laid along the existing road by an insertion process that causes minimum disturbance in the field. As per the report of the Wildlife Warden, Munnar, no works have been carried out in violation of Forest Conservation Act 1980. Since the work will result in providing better mobile connectivity to the remote villages and also to the various camps of Forest Department, the project is recommended.
