

Recommendation

Site inspection regarding Additional NH-47 Road

Range- Temagaon

Compartment	Beat	Area in ha.
RF 242	Kapasi	0.061
RF 243	Uskali	

01	Specific recommendations of the DFO with reason for approval of the project.	Previously, land diversions for widening of NH-47 have been approved. The additional requirement of 0.061 hac. is for merger/junction construction and is necessary for safety compliance. Hence, the project is recommended in the larger public interest under the condition that adequate mitigation measures for wildlife are taken-up in the area.
