

RECOMMENDATION

As, this project is proposed for construction of the transmission line project seems to improve overall power scenario without causing major damage of the forest and environment provided appropriate mitigated measures are implemented by the user agency as per guideline. The proposed diversion of forest land to the extent of 22.111 Ha under Mangalore Forest Division is unavoidable and barest minimum required for construction of 400 kV D/C Udupi Kasaragod Transmission line and therefore may be recommended for consideration.

Deputy Conservator of Forests,
Mangaluru Division, Mangaluru.
