

**Site Inspection Report of Chief Conservator of Forests, Central
Circle, for the Construction of 33KV Substation,
Varantharappilly at Pulikkanni**

Inspected the proposed project site on 27.02.2020, the proposed area is a part of notified Kodassery Reserve Forest. The area is an isolated patch comprised of 2007 Cashew Plantations (19.7 Ha) and 2008 Cashew Plantation (39 Ha). The proposed site is along the Varantharappilly – Palappilly road side and only two trees, one pole sized Teak tree and another one Kurangatty tree are present on the site. The project will not cause any large ecological disturbance to the forests. No rare/ endangered /unique species of flora and fauna are found in the proposed area and no protected/ archeological heritage site or any other important monuments are located in the area. The project is recommended to be considered favourably for the diversion in accordance to Forest (Conservation) Act, 1980.
