

Recommendation

Institution of Airport would have adverse effect on the flora and fauna of the concerned site. The said area falls near to well documented elephant corridor in "GAJAH" – Ghatshila- Kakrajhor, Musabani – Chakulia, Dumaria – Kundaluka and Murakanjia. Elephant usually moves in the area and there are many incidences of Man-Elephant conflict in the past. Construction would have adverse effect on the watershed of the region. However, the proposal may be accepted with the condition to take mitigation measures to contain the adverse effect on wild-life, birds, flora and habitat.
