

RECOMMENDATION

Construction of 400 KV Punatsangchu-Alipurduar D/C Power Transmission line is very much required for transmitting power to be generated by Punatsangchu-I project of Bhutan to India. Proposed current route is the shortest possible one involving least forest area of 16.39 Ha in Buxa Tiger Reserve (East) Division for diversion which is minimum required.

Hence the diversion of 16.39 Ha of Forest land as proposed is hereby recommended.
