

## **RECOMMENDATION**

A forest clearance application has been received from NHIDCL for widening and upgradation of NH-54 to 21-Lane with paved shoulder and geometric improvements from Km 8.00 to Km 380.00. The total road length has been divided into three packages for the purpose of forestry clearance application. Package-3 from 250 to 380 kms passes through forest areas of Lai Autonomous District Council forest area covering 4.81 ha. As this road project which is an essential development project for the State, and the proposed area of 4.81 for diversion is minimal and there are no alternate options as this is widening of existing road. The application is therefore RECOMMENDED for approval.
