

# Undertaking

It is certified that during the construction of road the affect of land sliding and soil erosion will be mitigate by providing necessary protection work i.e. R/walls, B/walls , wire grate works and cutting work will be done in scientific manners. The plantation of various species of grass ,beads & bushes also be done in the soil erosion portion in scientific manner which helps to counter the land sliding /soil erosion effect in the affected area with the help and direction of expert team of forest department. The provision of the same will be taken in the detailed estimate.
