

Query raised by Nodal Office, Dehradun: A large number of trees are proposed to be felled in the alignment of the proposal. User agency may explore feasibility of alternate alignment to reduce the no. of trees to be felled.

In the context, Power Grid Corporation of India Limited, 400/220 kV G.I.S., Jauljibi had explored the three alternate routes of 220 kV Pithoragarh Jauljibi transmission line and LOOP IN and LOOP OUT at Jauljibi from 400 kV D/C Dhauliganga Bareilly transmission line near by proposed 400/220 kV Jauljibi substation. The aerial distance from 220/132 kV Pithoragarh substation to 400/220 kV Jauljibi substation is 21.91 km which is called as Bee Line. We had explored the three alternate routes out of which two are in left bank of Bee Line and one in the right bank of Bee Line. As per the laying of the transmission line as well guidelines of Forest Conservation Act, 1980 minimum use of the Forest Land and lesser number of the trees to be affected in construction of transmission line avoiding the National Park, Wildlife Sanctuary, Reserve Forest and Eco Sensitive Zones.

Accordingly, this office had explored the three alternate routes in consideration to above guidelines. Alternate route details are as following:

Alternate - 1: This route is passing nearby the Bee Line by the route length of 26.723 km (Route length 24.023 km of 220 kV D/C Line and 2.70 km of 400 kV D/C line) having 90 Nos. of the angle towers and avoiding the habitation and plantation. The total Forest Land in the proposed alternate - 1 is 58.449 Ha. out of 96.500 Ha. of total land. The total length of transmission lines in Forest Land is 13.911 km. and in Private Land is 12.812 km. In this route there is no messy area, Wildlife Sanctuary Area, Defense Area, Reserve Forest and Eco Sensitive Zone and minimum number of the trees shall be affected.

As per the detailed survey in this route total tree enumeration is 4147. Out of total tree enumeration of 4147, the trees to be affected for construction of transmission line are 3031 numbers. However, we have extended the tower height to avoid the felling of Banj trees nearby Satgarh Van Panchayat. This office had also changed the type of towers for foundation works with Raised Chimney and Leg Extension type towers to avoid the benching / cutting of the virgin soil as per contour of the particular location. The certificate for non felling of Banj trees has already been uploaded in the Online proposal (Proposal No. FP/UK/TRANS/35527/2018).

Alternate - 2: This route is passing nearby the National Highway No. 125 which is far away from Bee Line and some portion of the line is passing nearby the Defense area of Charma (Didihat) as well as Reserve Forest namely **Deochula RF** and **Devchula RF** (from Loc. No. 50 to 59 having the route length of 2.408 km in RF) by the route length of 30.668 km (Route length 27.968 km of 220 kV D/C Line and 2.70 km of 400 kV D/C line) having 100 Nos. of the

4147
12/03/2019

cfuel

angle towers and avoiding the habitation and plantation. The total Forest Land in the proposed alternate - 2 is 75.962 Ha. out of 110.308 Ha. of total land. The total length of transmission lines in Forest Land is 21.465 km. and in Private Land is 9.203 km. In this alternate route there is a sliding zone and number of the villages nearby the road and at the time of the construction, ROW problem may arise. The total number of trees to be affected in this route are 7150. Hence, this alternate is not possible for construction of transmission line. Details of section wise trees to be affected is enclosed as **Annexure - A**.

Alternate - 3: This route is passing on the right side of Bee Line and is far away from the National Highway by the route length of 30.697 km (Route length 27.997 km of 220 kV D/C Line and 2.70 km of 400 kV D/C line) having 102 Nos. of the angle towers and avoiding the habitation and plantation. The total Forest Land in the proposed alternate - 3 is 64.673 Ha. out of 110.410 Ha. of total land. The total length of transmission lines in Forest Land is 18.239 km. alongwith **Dhvaj RF** (from Loc. No. 34 to 47 having the route length of 3.976 km in RF) and in Private Land is 12.458 km. In this alternate route there is a sliding zone and number of the villages nearby the road and at the time of the construction, ROW problem may arise. The total number of trees to be affected in this route are 6890. Hence, this alternate is not possible for construction of transmission line. Details of section wise trees to be affected is enclosed as **Annexure - B**.

Considering the facts mentioned above, Alternate - 1 has been finalized for laying of transmission line with minimum Forest Land involvement and minimum number of trees to be affected after the inspection of DFO, Pithoragarh and District Magistrate, Pithoragarh and finally submitted the proposal for diversion of 58.449 Ha. of Forest Land to Power Grid Corporation of India Limited.
