NOTES

NOTES :-

Height and amount have not been shown.

A relative height, h_r represents the approximate height, in meters, between the top and bottom of a steep slope.

A relative height, H_r , stated along a canal, between the height of the canal embankment and the top of the adjacent canal.

Tanks, shown here, in this sheet, usually occur within four July to December.

Tide-marks are represented throughout the sheet; only the important ones have been shown.

Unmarked road along Humber Branch (SANDA CANAL) is navigable, permission to use from it is given from the Navigation authorities.

The water level shown along rivers are shown in short type e.g. $\frac{1}{2}$ where otherwise numbers are shown.
