

Short narrative of the proposal

We wish to introduce ourselves as Telesonic Networks Limited a company incorporated under the companies Act, 1956 and its wholly owned subsidiary of **Bharti Airtel Ltd.** and registration certificate for infrastructure provider category -1(IP-1) awarded by Government of India, Ministry of Communication, Department of Communications.

It is our company vision to establish internet connectivity in all the rural areas of India, so that from education to health to agriculture to other many businesses which are carried in small villages can progress at a much higher rate and remain connected to the rest of the world through internet.

We are proposed to Lay the Optical fibre cable from Siliguri to Coochbehar, this route going through Jaipalguri territorial Forests on Nagarkata Block and the proposal of OFC laying on right side of the NH road shoulder edge. The NH -IX highway doesn't have ROW for laying cable hence we seeking the ROW permission from forest department for below given section.

1. KHUNIA BASTI (CHALSA) TO JHALDHAKA BRIDGE (NAGRAKATA)- 8.355 Km
2. DIANA FOREST-0.410 Km
3. DHARANIPUR T.G (CARRON) TO DIANA BRIDGE (DIANA FOREST)-1.930 Km

Total 10.695 Mtr (0.4278 hectare).

India is a country which has more than 6000 villages, more than half of the population live in rural areas and off the map villages and internet connection in these areas are a serious problem. Looking forward to solve the internet issue by laying new Optical fibre network in the following routes by providing internet connectivity to these routes following advantages and benefits will be enjoyed by the population of these areas.

Business Growth: -

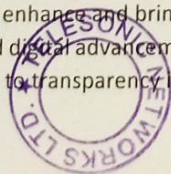

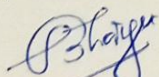

With the availability of ISP in this area, existing business and new will see tremendous growth. The connectivity will increase and thus because of abundant information through internet or google, many new start-ups will enhance and exiting small scale business can reach potential customers directly.

Reduce Migration: -

Migration comes mostly from rural localities. If town is developed and offered employment via internet connectivity, global communication and increased income then there would be lesser case of migration of local and they will prefer to stay in their city and work.

Better Communication and Banking: -

Internet will also enhance and bring rural areas closer to the word which is a significant step towards development and digital advancement will encourage e- banking system which will give population of your town access to transparency in regards to loans and liabilities.

Literacy Rate Hike: -

Today online teaching facility is empowering with the high-speed internet such as 4G and 5G it brings, the option of spreading education in a widespread way without the constraints of distance. In rural area where schools can be at quite a distance, thus the internet can help increase literacy rate of your town.

Agricultural Assistance: -

Through internet service farmers of your town will have and opportunity to gain intricate understanding of their business and also the ways and techniques in which they can improve their yield. It is a prominent initiative to reduce exploitation and offer guidance in terms of market price and interaction with direct customers.

It is our company vision to establish internet connectivity in all the rural areas of India, so that from education to health to agriculture to other many businesses which are carried in small villages can progress at a much higher rate and remain connected to the rest of the world through internet.

The future of your town and the upcoming generation is in your hands and All we want is you to show support towards us so that we can help town to grow and fulfil all the dreams that every family has seen for their children and themselves.

If the optical fibre is layed and established as early as possible, there will be endless benefits that your people can reap through it

Thanking You

For Telesonic Networks Limited
