Clarification for the transmission lines

The 33 kV transmission line from Lingapura Station is available till the middle of the forest, as shown in the sketch. This line is presently feeding to M/s Kirloskar & M/s Kalyani Industries. We will be using the same transmission line and a separate sub-station will be constructed near our proposed pump house location and supply will be drawn for our pump house & other connected facilities and hence, we had shown only those points in the sketch.

The existing transmission line is ending in the middle of the forest, near to M/s Kirloskar pump house. Our tap-off point is in between Kirloskar & Kalyani.

This is for information.
