However, the site proposed is densely vegetated with invasive species and the said land is a Deemed Forest. Compensatory Afforestation of 1000 saplings per hectare will be done only after heavy pruning of these invasive species of trees. The plantation will be done by eco restoration of the land by heavily pruning invasive species *Prosopis juliflora*.

As per the FCA Rules 2022 Section 11 "*Creation of Compensatory Afforestation*" the said CA Land already bears vegetation of 0.4 canopy density or more, there shall not be an additional requirement of planting of trees on such land but a programme for improvement of the forest crop shall be implemented by the Forest Department in a time-bound manner.

Therefore, the site is considered suitable for carrying out Compensatory Afforestation subject to the deposition of cost of pruning of trees before issuing working permission and subject to the handover of the litigation free land.
