NOTES :-

1. Rights and contours have not been shown.

A relative height, e.g., 30', represents the approximate height, in metres, between the top and bottom of a steep slope.

A relative height, e.g., 30', against a well, indicates its total depth in metres.

Tanks, shown dry, in this area usually contain water from July to September.

Most of unlined well symbols indicate covered tanks, called Kund, which usually contain surface collection of rainwater.

Digpi is a tank which is used for collection of water.

✓ I-tracks, in this sheet are generally motorable (four-wheel drive).

Cultivation is periodic and dependent on rainfall.
