

JUSIFICATION FOR LOCATIONTHE PROJECT IN FOREST AREAS

The proposed road construction from Samsing Village to Khani Gaon is a long pending demand since last 30 (thirty) years, of the people of these areas, as it is going to connect Duga State Highway to Khani Gaon.

All the public of these areas are going to be benefitted from this project.

There is no any motorable road connectivity to these areas from State Highway, so that, these areas and people of these areas are lagging behind rest of the State in progress, as its a known fact that, road water and electricity are the basic needs for the development of any area.

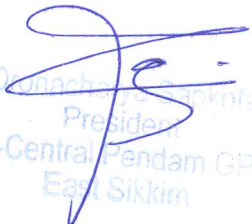

After the completion of this project, the people of these areas can be benefitted, as there, they can have small or medium industries, many cottage Industries, Hospital, Residential complexes and so on. Which work is taking 15 days time to be completed, can be done in 1 (one) day time, after the road is reached in these areas.

People will be self employed or can get employment in various sector.

As far as the construction of the road is concerned in forest area, we will be cautious enough to cut the trees which are of utmost requirement and will compensate the same by replanting the maximum trees in the nearby areas along the road side.
