Sir,

In reference to the above please find below our submission:

1. In field all the pillars are installed at 10mt interval as per guidance given by forest department for clear visibility & line of sight.
2. But as per the EDS raised in the portal by the dept. of Forest dated 23.03.2021 it was mentioned to submit the layout plan in 20mt intervals. Accordingly, the plan was submitted in the portal.
3. Now on receipt of your observation during the site inspection in regard to mismatch of pillar numbers & GPS points entered on the map & on the site, we have updated the Conveyor layout plan showing demarcation points as per the field condition in 10m interval.
4. We have re-checked few of these pillar points with GPS co-ordinates and these pillar points are matching with the co-ordinates in the attached layout.

In view of the above please find attached the revised layout Map. You are requested to kindly make a note of the above & process submission of your site inspection report, to enable the proposal for stage 1 clearance.
